COMPANY RESOURCES USAGE POLICY

Intent

Increased protection of information and Information Technology Resources to assure the usability and availability of those resources to all users of Altrosyn Technologies Pvt. Ltd. (“Company”) is the primary intent of this Policy. The Policy also addresses privacy and usage guidelines for those who access the Company’s Information Technology Resources.

Reference

Information Technology Resources for purposes of this Policy include, but are not limited to, Company owned or those used under license or contract or those devices not owned by the Company but intentionally connected to company-owned Information Technology Resources such as computer hardware, printers, digital accessories, voice-mail, software, e-mail and Internet and intranet access.

Anyone who has access to the company’s Information Technology Resources, including but not limited to, all interns, temporary employees, probationers, contractors, vendors and suppliers.

Policy

1. **Internet**

Internet usage is critical to our business; hence all our offices are Internet-enabled. However, this must be used judiciously. Access is authorized by managers based on business needs. Limited private use is permitted provided the private use does not interfere with or distract from a person’s work. Management has the right to access the system/network to determine whether private use is excessive or inappropriate.

The following activities, using the Company’s internet access are not permitted:

- attending to personal activities of a business nature
- viewing, other than by accident, sites of incoming emails portraying obscene, violent, defamatory and unlawful material and material that could cause the Company to be in breach of equal opportunity or anti-discrimination legislation, verbally, in writing or pictorially
- downloading or printing material as described above
- showing to others, or allowing to be seen by others, items as described above
- repeated or prolonged use that is not directly relevant to the Intern’s work
- introducing computer viruses by failing to follow company IT procedures
- downloading software from the internet or from unauthorized disks and CD ROMs on to the internal network

Furthermore, users may not conduct any form of "hacking" or use malicious code to penetrate or attempt to penetrate other computers or to deliberately release viruses or other harmful programs within either the Company’s network or the internet or bypass security features.

Failure to comply with these instructions is a disciplinary offence and will be subject to appropriate investigation. In serious cases, the penalty for an offence, or repetition of an offence, may include dismissal. The intern is expected to be continually aware of some forms of internet conduct or may also be open to criminal prosecution if needed.

2. **Email**

Email has legal status as a document and is accepted as evidence in a court of law. Even when it is used for private purposes, the Company can be held responsible for the contents of email messages, including any attachments. Access to emails can be demanded as part of legal action in some circumstances.

It is therefore important that email is used within the following guidelines:

- email should mainly be used for formal business correspondence and care should be taken to maintain the confidentiality of sensitive information.
- if electronic messages need to be preserved, they should be printed out and filed.
- limited private use of email is permitted, provided that such does not interfere with or distract from an intern's work. However, management has the right to access incoming and outgoing email messages to determine whether staff usage or involvement is excessive or inappropriate.
- non-essential email, including personal messages, should be deleted regularly from the ‘Sent Items’, ‘Inbox’ and ‘Deleted Items’ folders to avoid congestion.
- all emails sent should include the approved company disclaimer.

In order to protect the Company from the potential effects of the misuse and abuse of email, the following instructions are to be observed by all email users.

i. No material is to be sent as email that is defamatory, in breach of copyright or business confidentiality, or prejudicial to the good standing of the Company in the community or to its relationship with staff, customers, suppliers and any other person or business with whom it has a relationship.
ii. Email is not to contain material that amounts to gossip about colleagues or that could be offensive, demeaning, persistently irritating, threatening, discriminatory, involves the harassment of others or concerns personal relationships.
iii. The email records of other persons are not to be accessed except by management (or persons authorized by management) engaged in ensuring compliance with this policy, or by authorized staff who have been requested to attend to a fault, upgrade or similar situation. Access in each case will be limited to the minimum required to complete the task.
iv. When using email a person must not pretend to be another person or use another person's computer without permission.
v. Excessive private use, including mass mailing, "reply to all" etc. that are not part of the person's duties, is not permitted.

Failure to comply with these instructions is a disciplinary offence and will be subject to appropriate investigation. In serious cases, the penalty for an offence, or repetition of an offence, may include dismissal. The intern is expected to be continually aware of some forms of email conduct or may also be open to criminal prosecution if needed.

3. Computer Systems

You are expected to notify any problem in your computer, to your management or persons authorized by the management. Based on the nature of problem the problem will be rectified at minimum breakdown time. If you need any standby arrangements to be made, you can contact your team leader. You are advised to take regular back up of your data and important files.

4. Software

All necessary software is pre-installed on all the computer systems and/or available on the Company network. Use of the Company's network resources to illegally distribute or duplicate unauthorized copyrighted or licensed materials is strictly prohibited. To prevent computer viruses from being transmitted through the Company's e-mail and Internet system, there will be no unauthorized downloading of any unauthorized software. All software downloaded must be registered to the Company. You should contact Human Resources if you have any questions in this regard.

The unauthorized duplication and use of third-party copyrighted software and/or documentation by the users is a violation of the copyright law, except as permitted by law or by the owner of the copyright. Violation of copyright laws can subject users to liability for significant civil and criminal penalties. In case of an intern's attempt to duplicate any copyrighted software, the intern should bear all the penalties and indemnify the Company against such charges.

The following practices, unless granted by a specific license, are among those prohibited by this policy:

- Making additional copies of third-party software products for your use on other computers.
- Making copies of software for friends or associates.
- Distributing software over a network.
- Providing copies of software to bulletin board services

5. Copyright Issues

Users are not allowed to transmit any copyrighted materials belonging to any entities or third parties using the email or internet or any other medium. All users obtaining access to other companies' or individuals' materials must respect all copyrights and may not copy, retrieve, modify or forward copyrighted materials, except with permission. Failure to observe copyright or license agreements may result in disciplinary action up to and including termination. The intern must endure all such legal charges and lawsuits and protect the Company from significant lawsuits and public embarrassment that may arise out of intern's actions.

6. Access to Information

E-mail and its contents, as well as any other data stored on or transmitted by the company-owned equipment, are the property of the Company. The Company may access this data under legal requirements; accordingly, the privacy of e-mail, voice mail and similar data cannot be guaranteed.

The Company reserves the right to examine the content of communications over the Internet, whether in email, chat, or any other medium when sent or received using Company's systems. It is the intention of the Company to monitor the existence of the traffic being generated. Additionally, because of the vulnerability companies have towards litigation over inappropriate conduct in the workplace environment, it is the intern's responsibility to ensure that the Company resources are not being used to support inappropriate activities.

7. Passwords

Individual password security is the responsibility of each intern. Passwords are an essential component of the Company's computer and network security systems. To ensure that these systems perform effectively, the users must choose passwords that are difficult to guess. This means that passwords must not be related to your job or personal life. This also means passwords should not be a single word found in the dictionary or some other part of speech.

Passwords must not be stored in readable form in batch files, automatic log-in scripts, software macros, terminal function keys, in computers without access control systems, or in other locations where unauthorized persons might discover them. Passwords must not be written down and left in a place where unauthorized persons might discover them. Immediately upon assignment of the initial password and in all cases of password "reset" situations, the password must be immediately changed by the user to ensure confidentiality of all information.

Under no circumstances, Users shall use another user's account or password without proper authorization. Under no circumstances, the user must share his/her password(s) with other user(s), unless the said user has obtained from the concerned Manager/IT Head the necessary approval in this regard. In cases where the password(s) is/are shared in accordance with the above, the user shall be responsible for changing the said password(s) immediately upon the completion of the task for which the password(s) was shared. In cases where no prior approval had been obtained for sharing of password(s) with other user(s), such user shall be completely responsible for all consequences that shall follow in respect of breach of this Policy and the Company shall initiate appropriate disciplinary proceedings against the said user.

8. Security (Access Control)

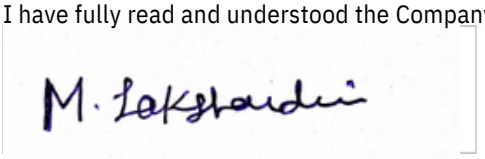

Users are forbidden from circumventing security measures. No user must physically connect or disconnect any equipment, including Company owned computers and printers, to or from any of the Company network.

Only persons who have been authorized by the Manager/IT Head can make emergency changes to any computer system or network of the Company.

Unless the prior approval of the IT Head has been obtained, users shall not establish Internet or other external network connections that could allow non-authorized users to gain access to systems and information of the Company. These connections include the establishment of multi-computer file systems, Internet web pages & FTP servers.

Users must not test, or attempt to compromise computer or communication system security measures unless specifically approved in advance and in writing by the IT Head. Incidents involving unapproved system cracking (hacking), password cracking (guessing), file decryption, software copying, computer configuration changing or similar unauthorized attempts to compromise security measures will be considered serious violations of Company's policy. Likewise, short-cuts bypassing system security measures is absolutely prohibited.

I have fully read and understood the Company Resources Usage Policy and I, hereby, agree to abide by the same.
