# Kayalvizhi V

Chennai, India
+919445777855 | kayal06vizhi@gmail.com|linkedin| github
**Problem Solving: 1500+ SkillRack | 120+ LeetCode**

## EDUCATION

- **St. Joseph's Institute of Technology** — Chennai, India Expected Graduation: May 2028
  *B.Tech in Artificial Intelligence and Data Science* | CGPA: 9.26/10
- **Maharishi Vidya Mandir Senior Secondary School —** Chennai, India
  *Class XII (CBSE)* | Percentage: 90.8% April 2024
  *Class X (CBSE)* | Percentage: 96.8% May 2022

## TECHNICAL SKILLS

• Programming: Java, Python, C
• Familiar with AI/ML and Data Science fundamentals
• Libraries: NumPy, Pandas, scikit-learn, Regex
• Tools & Platforms: VS Code, GitHub
• Concepts: OOP, AI/ML & Data Science Fundamentals, Supervised Learning, Feature Engineering, Model Evaluation

## EXPERIENCE

**Software Development Intern | Ticking Minds Technology Solutions Pvt. Ltd.**
*On-site* | Jun 2026

- Learned Software Development Life Cycle (SDLC), Agile Scrum methodology, and Software Testing fundamentals.
- Designed and executed test cases using Boundary Value Analysis (BVA), Equivalence Class Partitioning (ECP), and Decision Table Testing.
- Performed API testing using Postman and gained hands-on experience in defect reporting, bug life cycle management, and test documentation.

**AI Intern – AI for Sustainability | IBM SkillsBuild × AICTE**
*Virtual* | Dec 2025 – Jan 2026

- Researching potential AI-driven solutions aligned with UN Sustainable Development Goals (SDGs)
- Participating in an AI-focused internship centred on Responsible AI, sustainability, and ethical AI practices
- Gaining hands-on exposure to prompt engineering and IBM Granite foundation models.

## PROJECTS

**NLP-based Sentiment Classification**

- Built an NLP pipeline to classify Tamil text into Happy, Sad, and Angry
- Implemented TF-IDF vectorization and Logistic Regression
- Achieved ~88% accuracy on test data
- Tools: Python, scikit-learn, Pandas, regex

**Smart Skill Gap Analyser**

- Designed an AI-based system to analyze resumes against target job roles
- Generated personalized skill gap insights and learning recommendations
- Tech Stack: Python, NumPy, Pandas, VS Code
- Concepts: Data preprocessing, recommendation systems

**Banking API System**

- Developed a mini banking management system using Java and OOP principles.
- Implemented account creation, deposits, withdrawals, balance tracking, and user management.
- Used .dat files for persistent data storage through file handling.
- Maintained the project using GitHub for version control.

**Vending Machine System**

- Developed a vending machine simulation using Java and OOP concepts.
- Implemented product selection, cash/UPI payment handling, and transaction processing.
- Designed separate classes for products, payments, and machine operations for modularity.

- Managed and maintained the project using GitHub.

## ACHIEVEMENTS & COMPETITIONS

- **Blaze-A-Trial Hackathon (Internal SIH)** Sept 2025
  - — Selected among the top 45 teams eligible to register for Smart India Hackathon (SIH)
  - — Team was waitlisted during the final SIH shortlisting phase
- **National Symposium at Sairam college of engineering, Chennai,** April 2025
  - — Paper Presentation on *Application of Trigonometry in Real Life* | **3rd Place Winner**

## COURSES & CERTIFICATIONS

• **NPTEL –** Python for Data Science (Elite + Silver)
• **NPTEL** – Introduction to Machine Learning (Elite)
